

The Faculty of Law of the University of Santiago de Compostela is pleased to announce and host the INTERNATIONAL CONFERENCE "WORK-LIFE BALANCE AND THE ECONOMIC CRISIS: AN INSIGHT FROM THE PERSPECTIVE OF COMPARATIVE LAW"(Italy, UK, Germany, Argentina and Spain), which will take place on 25 and 26 April, 2014.

The topic is of indisputable importance to ensure a balanced advancement of social rights in today's society. However, and somewhat surprisingly, the issue has been largely neglected in the current debate as well as in national and European policies. We expect that the economic crisis will soon come to an end, hopefully accompanied by the desire not only to increase the number of jobs, but also to improve the quality of employment, which is essential to the promotion of work-life balance rights.

The organizers of the event - ADAPT , AEDTSS and the USC - would like to invite all those interested in the subject to actively participate in the conference, by attending the event or by submitting a contribution on the topic of the conference (presentation or poster). We believe that an active participation will stimulate the current debate and bring about improvements in the field.

All those who have an interest in the conference can find complete information about the event, registration and more at: <http://moodle.adaptland.it/course/view.php?id=22>

Thank you very much for your interest.

Santiago de Compostela, January 14, 2014.

The organisers ADAPT, AEDTSS and USC.
